Application Performance Monitoring system with metrics collection, logs, traces, and automated alerts.

📊 **Enterprise monitoring for complete observability**

Java Spring Boot PostgreSQL

Grafana

Corporate TV System

Digital signage system with content management, scheduling, Chromecast support, and real-time communication.

⚡ **Real-time corporate communication for multiple**

Control Tower

Executive dashboard for real-time application monitoring, automated routines, and integrated alert system.

📈 **360° real-time operational visibility**

screens

React Flask Socket.IO

Streamlit Plotly Selenium

Traffic Violations Bot

RPA automation for queries on DETRAN portals with automatic report generation and scheduling.

 Saves hours of manual work per week

Python Selenium Pandas

CargoSnap Integration

Container inspection management system with API integration, custom workflows, and photographic reports.

 Complete port inspection management

Django REST PostgreSQL JWT

Professional Experience

Systems Developer Jr

iTracker | ICTSI Group - Port of Rio de Janeiro

2024 - Present

Developing technological solutions to optimize port operations and business management.

- ▶ Developed 8+ enterprise systems optimizing daily operations (Corporate TV, Control Tower, CargoSnap, GateLog)
- ▶ Created RPA automations for banking and financial processes, reducing manual execution time by hours per week
- ▶ Implemented real-time dashboards with Streamlit for executive monitoring of applications and operational metrics
- ▶ Developed GPS tracking system with Telematics API integration for real-time fleet management
- ▶ Application deployment and maintenance on Linux (Ubuntu) and Windows Server with Nginx
